KANKNARRAH GROUP OF COMPANIES

OUR PROFILE

Kanknarrah group started its journey from Kanknarrah Jute Mill (est. 1882) which was acquired from the British Management Agency, Jardine Henderson Limited in the year 1988. It is situated on the banks of the river Hooghly, about 40 kilometres from Kolkata. The corporate entity of Kanknarrah Jute Mill, Kanknarrah Company Limited, is a Public Limited enterprise listed on the Calcutta Stock Exchange.

Check our Video

YEAR 1882 — Unit Established named Kanknarrah Jute Mill.

YEAR 1988 — Took Over Kanknarrah Jute Mill (est. 1882), from the British Managing agency, Jardine Henderson Limited in this year.

YEAR 1992 — Took over operations of Shri Hanuman Jute Mill (est.1927) and give it a corporate Identity Name Tepcon International (India) Limited.

YEAR 2016 — Took over another jute mill name Naffarchandra Jute Mills and started a new corporate identity named Kanknarrah Jute Private Limited.

After establishing a strong foothold in the jute industry we took over operations of Shri Hanuman Jute Mill (est. 1927) situated in Howrah about 10 kilometers from the Central Business District of Kolkata, in 1992 to increase our production capacity eyeing expansion and growth. Its corporate entity is Tepcon International (India) Limited. To further expand our operations and widen our reach we took over the reign of another jute mill Naffarchandra Jute Mills (est. 1935) in 2016 situated opposite Kanknarrah Jute Mill having corporate entity of Kanknarrah Jute Private Limited.

KANKNARRAH GROUP OF COMPANIES

WHY JUTE

- Jute fiber is 100% bio-degradable and recyclable and thus environmentally friendly.
- Jute has low pesticide and fertilizer needs.
- It is the cheapest vegetable fiber procured from the base or skin of the plant's stem.
- It is the second most important vegetable fiber after cotton, in terms of usage, global consumption, production, and availability.
- It has high tensile strength, low extensibility, and ensures better breathability of fabrics. Therefore, jute is very suitable in agricultural commodity bulk packaging.
- It helps to make top quality industrial yarn, fabric, net, and sacks
- Jute fiber blends wonderfully with other types of fibers, both synthetic and natural, while accepting cellulosic dyes that include natural, basic, sulfur and pigment dyes, creating harmonious designs.
- Bags and other materials made from jute is biodegradable, which means that when left unused for some time, these will get destroyed on their own, leaving the world free of environmental pollution, as against plastic that remains intact for ages and so causes huge environmental hazard.

WHY US

- Fully integrated state of the art plant
- Our Units are ISO 9001:2015, OHSAS 18001 and ISO 14001 certified
- Products with BIS Certification
- Huge production capacity to fulfill demand
- Dedicated Fine Yarn Unit – we can manufacture yarn in different colours, counts and ply
- Dyeing and Bleaching unit
- Fast, shuttle less weaving looms
- Continuous modernisation of machinery
- Regular training programs for skill development of our workforce

Most of our products can be customised and printed according to customer's requirements. We maintain a constant quality check process as per industry standards and strive to ensure timely delivery to our clients.

KANKNARRAH GROUP OF COMPANIES

EXPORTS
